                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Indels
Protegrin 1 precursor - pig
N.Alternate names: neutrophil peptide 1
C.Species: Sus scrofa domestica (domestic pig)
C.Species: Sus scrofa domestica (domestic pig)
C.Species: 19-Oct-1995 #sequence_revision 03-Nov-1995 #
C.Accession: S66284; S45712; S36820; S34585; S57607
RK:Zhao, C.; Ganz, T.; Lehrer, R.I.
FEBS Lett. 368, 197-202, 1995
A.Title: The structure of porcine protegrin genes.
A.Reference number: S66283; MUID:95354835
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              5;

JO1873
BRI protein - tomato mottle virus (isolate Florida)
C; Species: tomato mottle virus
C; Species: tomato mottle virus
C; Date: 17-Feb-1994 #sequence_revision 17-Feb-1994 #text_change 23-Jul-1999
C; Accession: JQ1873
R; Abouald, A.M.; Polston, J.E.; Hiebert, E.
J. Gen. Virol. 73, 3225-3229, 1992
A; Title: The nucleotide sequence of tomato mottle virus, a new geminivirus isolated from A; Reference number: JQ1873
A; Accession: JQ1873
A; Reference number: JQ1873
A; Retauns: translation not shown
A; Molecule type: DNA
A; Residues: 1-257 <ABO>
A; Conserreferences: GB:L14461; NID:g1200530; PIDN:AAC32418.1; PID:g295328
C; Genetics:
A; Map position: segment B
C; Superfamily: tomato golden mosaic virus BRI protein
                                                                                                                                                                                                                                                                                                                                                                                                                                              hypothetical protein AAD39285.1 [imported] - Arabidopsis thaliana
C;Species: Arabidopsis thaliana (mouse-ear cress)
C;Species: Arabidopsis thaliana (mouse-ear cress)
C;Species: Arabidopsis thaliana (mouse-ear cress)
C;Accession: B86273

R; Rounsled (S. Lin, X.); Ketchum, K.A.; Crosby, M.L.; Brandon, R.C.; Sykes, Submitted to the EMBL Data Library, July 1997
A; Description: Arabidopsis thaliana chromosome II BAC T20K24 genomic sequence.
A; Recession: T00533
A; Status: translated from GB/EMBL/DDBJ
A; Molecule type: DNA
A; Residues: 1-1090 cROU>

J. Biochem. 195:611-619(1991).

-!- FUNCTION: CUTTLEFISH SPERMIGGEMESIS IS CHARACTERIZED BY A DOUBLE NOCLEAR PROTEIN TRANSITION: HISTONES -> SPERMATID-SPECIFIC PROTEINS (TJ/T2) -> PROTAMINES (SPL/SP2). THE PROTAMINES COMPACT SPERM DNA INTO A HIGHLY CONDENSED, STABLE AND INACTIVE COMPLEX.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Retief J.D., Krajewski C., Westerman M., Winkfein R.J., Dixon G.H.;
"Molecular phylogeny and evolution of marsupial protamine Pl genes.";
Proc. R. Soc. Lond., B. Biol. Sci. 259:7-14 (1995).
-!- FUNCTION: PROTAMINES SUBSTITUTES FOR HISTONES IN THE CHROMATIN OF
SPERM DURING THE HAPOLD PHASE OF SPERMATOGENESIS. THEY COMPACT
SPERM DIA INTO A HIGHLY CONDENSED, STABLE AND INACTIVE COMPLEX.
                                                                                                                                                                                                                                                                                                                                                                                                                          Retief J.D., Krajewski C., Westerman M., Winkfein R.J., Dixon G.H.;
